STARTLING STATISTICS

Prevalence and Trends by
Occupation and Industry Codes

- The federal government estimates that 71% of illegal drug users are employed
- Absenteeism rates are 66% higher among drug users than non-drug users.
- Health benefits utilization is 300% higher among drug users than non-drug users
- A recent study showed that on average, a drug user costs the employer \$7,000 annually
- 47% of workplace accidents are drug related

Dr. Vercellotti found that local companies didn't always know who to trust for their drug testing needs. So, he decided to start a company that focused on the customer and their need to have a drug-free and fit for duty workplace. The company's mission is to provide excellent customer service and quality examinations. Our on-site drug testing is performed quickly and efficiently so your employees can get back to work with minimal downtime. We also pride ourselves on knowing all the regulations and helping our customers to stay compliant.
